CLEVELAND, OHIO

MODERN

AS TOMORROW

This new line of GB fixtures was developed from the beginning to be the finest ever produced. Born at the threshold of a new era in business, at the start of a new trend in living standards, it combines brilliance with worth, beauty with value, and modernity with practical design. Unmatched and unexcelled in craftsmanship, these fixtures set a new style for what is smartly modern. For that spirit of craftsmanship—unrelenting desire to create something more serviceable, something more beautiful—has been the inspiration out of which constant research, design and practical production has evolved the simple yet singular charm of these new units. Modern as tomorrow, but with today's standard of values, GB fixtures are the instant answer to the demand for strikingly distinctive, yet economically priced lighting units.
